

ANKUSH SINGH RAWAT

ankushsinghrawat@gmail.com — GitHub — LinkedIn

EDUCATION

Graphic Era Hill University, Bhimtal
Bachelor of Technology in Computer Science

2023 – Present

ACHIEVEMENTS

- Participated in 10 national-level hackathons.
- Secured victory in 2 of the participated national-level hackathons.
- Solved 200+ competitive programming questions across LeetCode and CodeChef platforms.

EXPERIENCE

QuickHyre

Python Developer Intern

2025

- Developed backend applications and automation scripts using Python.
- Built and integrated REST APIs for web applications.
- Collaborated with the development team on real-world software projects.
- Debugged, tested, and optimized Python code for improved performance.
- Worked with version control and followed industry-standard development practices.

Vivid Nexus

Intern

2025

- Worked across Web Development.
- Collaborated on intern-level projects.
- Gained hands-on experience with real-world systems.

PROJECTS

System Pulse

A real-time System Monitoring Dashboard designed to track and log CPU utilization, memory consumption, and active processes. Utilizes a multi-agent architecture (Task Manager, System Monitor, Security, Learning, and Database agents) to provide intelligent task scheduling, threat detection, and real-time visualization via WebSocket integration. Captures unique Process IDs (PIDs) and stores historical system data into a database for in-depth performance analysis and trend tracking.

Social Saver Bot

An automation-based prototype designed to capture and organize social media thread content without relying on external APIs. Features WhatsApp integration for saving links, passwordless authentication, a dashboard for organizing links, smart search/filtering, and email sharing with formatted previews.

PahadiScript Web Interpreter

Designed and developed a beginner-friendly programming language using Hindi-based keywords (e.g., agar, bol, phir) and implemented a working web-based interpreter. Implemented lexical analysis using PLY, developed a syntax parser, built an execution system, and created an interactive React-based dashboard for code execution and metrics.

Graph-Based Financial Fraud Detection (GNN)

Tech Stack: Python, PyTorch Geometric, NetworkX, Pandas. Used Graph Neural Networks to detect suspicious relationships hidden across linked transaction networks.

TECHNICAL SKILLS

- **Programming:** Python
- **Machine Learning / Deep Learning:** PyTorch, Scikit-learn, TensorFlow
- **Computer Vision / NLP:** OpenCV, YOLO, Transformers
- **Data Analysis:** NumPy, Pandas, Matplotlib, Excel, Power BI
- **Tools:** FastAPI, Flask, React.js, PLY, Git, Docker, FAISS, Socket.IO

RELEVANT COURSEWORK

Machine Learning, Deep Learning, Data Structures, DBMS, Operating Systems
